

"WELCOME LETTER"

Thank you for choosing our office to care for your dental needs. Our dental team welcomes you and appreciates the opportunity to provide you with excellent dentistry in a comfortable, caring setting. Our friendly staff, warm office, and caring attitude will put you at ease when you come into our office. As a new patient, we would like to share our approach to service. We realize you may have questions regarding our specific dental practice, office policies, insurance, and fee structure, so feel free to browse our website (www.parkdentistry.com) or ask if you have any questions.

We believe quality care should be made available to everyone. Preventive dentistry is our goal for every patient. This involves daily dental hygiene, proper nutrition, periodic cleanings and check-ups. It may not be where we start with every new patient, but that is what we want to attain and maintain, especially with all the evidence linking dental health to overall health!

Restorative dentistry is basic repair of the mouth. We replace broken or leaking fillings, build crowns, implant crowns and bridges, fit partial and full dentures and realign your bite. If gum disease is detected, that is treated. If infection inside the tooth is detected, root canal therapy would be recommended as an alternative to extraction.

Cosmetic dentistry is becoming more popular among the general population as new materials and procedures become available. Gaps, chips, discolored and misaligned teeth can be modified to create a beautiful smile accessible to everyone. Dr. Dabhi has special interests and talents in this area of dentistry.

Attached: our NEW PATIENT FORMS. Please bring these, along with your insurance card, to your first appointment. NOTE: Please bring all current x-rays from your previous dentist (including bitewings taken within the last two years and panoramic x-rays taken within the last 5 years). We need current x-rays to complete a thorough exam; therefore, if x-rays are not available – new ones will need to be taken. Also, if you need to PRE-MEDICATE prior to dental work – please let us know in advance of your appointment. Thank you.

Again thank you for choosing our office, we look forward to a lifetime of continuing care.

Best Regards

Dr. Josephine Dabhi, D.D.S.
